Former Chief Minister of Andhra Pradesh

INVITATION

Sri Y. S. Jagan Mohan Reddy
Honourable Chief Minister of Andhra Pradesh

Inauguration of
Dr. Y. S. R. Memorial Lecture Series

8th July 2021

Professor **Raj Reddy** is a well-known Computer Scientist specializing in Artificial Intelligence, Robotics and Human-Computer Interaction. His journey from a village in AP to dizzying world technology heights is fascinating, exemplary and worthy of emulation. He received several awards during his career spanning six decades and prominent among them are Padma Bhushan from Government of India, Turing Award, Legion of Honor from France and the latest being induction into Computer History Museum (CHM), Silicon Valley, California.

Prof. RAJ REDDY

YSR Memorial Lecture on

Emerging Technologies and Implications for the Future of Education

It has been my honour to be present when Dr. YSR announced the creation of a university to benefit the gifted rural youth (in the form of three IIITs) in the three regions of undivided Andhra Pradesh. He felt identifying and providing full scholarship to the top 1% of the rural youth will yield enormous future dividends. The resulting institution, RGUKT, provides a 6-year integrated program, with free food, accommodation, tuition, and uniforms. Admission was based on Selecting the Mandal Best while following the reservation norms, ensuring Geographic Equity. Free laptops and internet connection ensured that remote instruction with lecturers at a distance is possible. Selecting the top students after the 10th class yielded more than half girl students. Dr. YSR's vision was revolutionary then and even today.

Looking to the future, in a post-COVID world, the RGUKT model of remote learning with local mentors becomes even more relevant. In the future, RGUKT will be able to expand its mission to provide quality education for ALL rural students (not just the top 1%) that currently do not have access to affordable local education. It will now be possible to provide an RGUKT affiliated KG to PG college in every village. This assumes that RGUKT will become an Online University, with KG to PG remote education reaching all the villages. With Teaching Assistants (selected from previous local graduates) in each class, students will have ready access to human guides to provide 1-to-1 mentoring. It assumes that every Village has WiFi access and every student has a Tablet. The same facilities can be used in the evening for employment-oriented remote education for adults.
